# MATERIAL SAFETY DATA SHEET

Page 1 of Total 4 Date of Issue: March 2008 MSDS No. FMC/HGGT/1

## SECTION 1 | IDENTIFICATION OF THE MATERIAL AND SUPPLIER

**Product Name:** HOMEGUARD® GT GRANULAR TERMITICIDE

Other Names: Bifenthrin.

**Use:** Termite cavity protection for pre-construction use in buildings and

other structures.

**Company:** FMC Australasia Pty Ltd.

Address: Unit 6, 9 Archimedes Place, Murarrie, Qld 4172

## **SECTION 2 | HAZARDS IDENTIFICATION**

Not classified as hazardous according to criteria of NOHSC Australia. Not classified as a Dangerous Good according to the ADG Code.

## SECTION 3 COMPOSITION/INFORMATION ON INGREDIENTS

**Ingredients:** 

CHEMICALCAS NUMBERPROPORTIONBifenthrin82657-04-31 g/kgOther ingredients determined not to be hazardousmixtureTo 100 %

## SECTION 4 | FIRST AID MEASURES

#### **FIRST AID**

Swallowed: If poisoning occurs, contact a doctor or Poisons Information Centre. Phone

Australia (13 11 26).

**Eye:** Particulates may scratch eye surfaces and/or cause mechanical irritation.

Remove from eye as for any foreign object. If irritation persists, obtain medical

attention.

**Skin:** After handling, and before eating, drinking, smoking or going to the toilet wash

with soap and water.

In case of adverse exposure to vapours that may be formed at point of

combustion temperatures, remove patient to fresh air. If breathing discomfort

occurs, obtain medical attention.

**Advice to Doctors:** Concern should be taken of the physical damage that the GT may cause if ingested. The plastic granule is polymer, which is considered non-toxic. Bifenthrin, the active ingredient in this product, is a pyrethroid insecticide. The level of bifenthrin in the GT (0.1%) is considered to be so low as to not be toxic, and tests have shown that the bifenthrin is not available for release from the granule. Treatment is otherwise symptomatic and supportive.

**Product Name:** 

## **HOMEGUARD GT**

Page 2 of Total 4 Issued: March 2008 FMC/HGGT/1

# **SECTION 5** | **FIRE FIGHTING MEASURES**

**Specific Hazard:** Thermal decomposition and burning may produce toxic byproducts.

**Extinguishing media:** Foam, CO<sub>2</sub> or dry chemical. Soft stream water fog if no alternatives. Contain all runoff.

**Hazards from combustion products:** On burning, will emit toxic fumes of carbon monoxide, carbon dioxide, hydrogen chloride, chlorine, fluorine and hydrogen fluoride etc.

**Precautions for fire-fighters and special protective equipment:** Isolate fire area. Evacuate downwind. Wear full protective clothing and self-contained breathing apparatus. Do not breathe or contact smoke, gases or vapours generated.

# SECTION 6 | ACCIDENTIAL RELEASE MEASURES

**Emergency procedures:** Pick up spilled granules. If unable to use as directed on the label, re-seal granules in a plastic bag. Wash hands and arms with soap and water after handling GT.

Material and methods for containment and cleanup procedures: Not applicable to this product.

Do NOT allow product to enter sewers, drains, dams, creeks or any other waterways.

# SECTION 7 HANDLING AND STORAGE

**Precautions for Safe Handling:** Generally no special precautions are required. Wash hands after use.

**Conditions for Safe Storage:** Store in closed original packaging, in a cool, well ventilated area away from children, animals, food and feedstuffs. Do not store for prolonged periods in direct sunlight. Do not use or store near heat, open flame or hot surfaces. Do NOT allow product to enter sewers, drains, creeks or any other waterways.

## SECTION 8 | EXPOSURE CONTROLS / PERSONAL PROTECTION

#### **National Exposure Standards:**

No exposure standard for bifenthrin has been established by NOHSC Australia.

#### **Biological Limit Values:**

No biological limit allocated.

## **Engineering controls:**

Use in ventilated areas.

#### Personal Protective equipment (PPE):

<u>Work Clothing</u>: No special protective clothing is required. As a good work practice, wear clothing that minimises skin contact with GT.

Personal Hygiene: Wash hands and arms before eating, drinking or smoking.

## **SECTION 9 | PHYSICAL AND CHEMICAL PROPERTIES**

**Appearance:** Dark cylindrical granules.

Odour: No odour.

**Boiling point:** Not relevant - solid at ambient temperatures. **Freezing point:** Not relevant - solid at ambient temperatures.

**Bulk Density:** 360 g/m³. Not available. **Solubility in Water:** Not soluble.

**Flammability:** This material may support combustion at elevated temperatures.

Product Name: HOMEGUARD GT Page 3 of Total 4 Issued: March 2008 FMC/HGGT/1

**Corrosive hazard:** Non corrosive; compatible with stainless steel, polyethylene etc.

Flashpoint (°C): > 215°C (estimated). Flammability Limits (%): Not established.

**Poisons Schedule:** Product is not a scheduled poison.

## SECTION 10 | STABILITY AND REACTIVITY

Product is considered stable in ambient conditions.

#### SECTION 11 TOXICOLOGICAL INFORMATION

# Potential Health Effects:

This product is expected to have low toxicity, and if swallowed the mechanical effects are expected to be of greater concern. Bifenthrin, the active ingredient in this product is present at 0.1%. Ingestion of large doses of bifenthrin by laboratory animals produced signs of toxicity which included clonic convulsions, tremors and bloody nasal discharge. But it is not likely to be physically possible to consume large quantities of bifenthrin by ingesting the plastic GT.

#### Acute

**Swallowed:** Not expected to be toxic.

**Eye:** May produce mechanical irritation to the eye.

**Skin:** This product has a low dermal toxicity.

Inhaled: Unlikely to cause inhalation toxicity unless the product is at elevated

temperatures or is burned. Vapours and gases released under thermal

decomposition may be toxic.

<u>Chronic</u>: No data available on this product. Bifenthrin the active ingredient in this product is present at 0.1%. In studies with laboratory animals, Bifenthrin did not cause teratogenicity or reproductive toxicity. Tremors were associated with repeated exposure of dogs, rats, rabbits and mice to Bifenthrin. The overall results from a battery of genotoxicity studies indicate that Bifenthrin is not considered to be genotoxic. Ames test results were negative.

## **SECTION 12 | ECOLOGICAL INFORMATION**

Environmental Toxicology: The active ingredient, Bifenthrin, is highly toxic to fish and aquatic arthropods with LC $_{50}$  values ranging from 0.0038 µg/L to 17.8 µg/L. In general, the aquatic arthropods are the most sensitive species. Care should be taken to avoid contamination of the aquatic environment. Bifenthrin had no effect on molluscs at its limit of water solubility. Bifenthrin is only slightly toxic to both waterfowl and upland game birds with LC $_{50}$  values range from 1800 mg/kg to > 2,150 mg/kg. Do not contaminate sewers, drains, dams, creeks or any other waterways with product.

**Environmental Properties:** The active ingredient, Bifenthrin, degrades at a moderate rate in agricultural soils ( $t\frac{1}{2} = 50$  to 205 days), and more rapidly on the surface of bare soils ( $t\frac{1}{2} = 7$  to 62 days). Bifenthrin is tightly bound in most soils and has extremely low water solubility.

#### SECTION 13 | DISPOSAL CONSIDERATIONS

**Spills & Disposal:** In the case of spillage, pick up the spilled material and place in sealed plastic bags and dispose of waste as indicated below. Keep material out of streams and sewers. Dispose of wastes in accordance with the requirements of Local or State Waste Management Authorities via an approved industrial waste disposal site.

Product Name:	HOMEGUARD GT	Page 4 of Total 4 Issued: March 2008
		FMC/HGGT/1

Always put unused or spilled granules back into its original packaging for re-use. Dangerous to Fish: Do NOT allow product to enter sewers, drains, dams, creeks or any other waterways.

# **SECTION 14 | TRANSPORT INFORMATION**

Homeguard GT is not classified as a Dangerous Goods.

## **SECTION 15** | **REGULATORY INFORMATION**

Not classified as a hazardous substance according to criteria of NOHSC Australia. Under the Standard for Uniform Scheduling of Drugs and Poisons (SUSDP No. 19), this product is not a scheduled poison.

Product is not classified as a Dangerous Good according to the ADG Code (6<sup>th</sup> Ed), the International Maritime Dangerous Goods (IMDG) Code and the International Air Transport Association (IATA).

# **SECTION 16 | OTHER INFORMATION**

Issue Date: March 2008 (first issue).

Key to abbreviations and acronyms used in this MSDS:

ADG Code Australian Dangerous Goods Code (for the transport of dangerous goods by

Road and Rail).

Genotoxic Capable of causing damage to genetic material, such as DNA.

NOHSC National Occupational Health and Safety Commission.

PPE Personal protective equipment.

Teratogenic Capable of causing abnormalities in a developing foetus (causing birth defects).

This MSDS summarises our best knowledge of the health and safety hazard information of the product and how to safely handle and use the product in the workplace. Each user should read this MSDS and consider the information in the context of how the product will be handled and used in the workplace including in conjunction with other products.

If clarification or further information is needed to ensure that an appropriate risk assessment can be made, the user should contact this company.
