

Technical Bulletin

Large 420g can

- Cislin Ultra Fast-Shot is designed as a crack and crevice surface spray with fast knockdown and residual activity.
- This water based aerosol is not a space spray.
- Always use the crack and crevice tube supplied.
- Shake the contents well before and regularly during use.
- Product will foam when applied heavily to surfaces. This foam will dissipate over time.

What you should expect from a water based formulation

Cislin Ultra Fast-Shot is a new generation of aerosol utilizing a unique water based formulation. This means that you will no longer have to put up with the smelly, reactive solvents typical in older type aerosol products. Will not stain surfaces or fabrics (including plastics and painted surfaces) where water alone will not stain. Cislin Ultra Fast-Shot can therefore be used with confidence in even the most sensitive of environments . You will notice that the product does not appear to have the high pressure typical of an older style aerosol however Cislin Ultra Fast-Shot is perfect for residual applications where this high pressure is a problem.
