

From 24 March 2026, the APVMA has suspended all SGAR registrations and label approvals.

This SGAR product may continue to be used during the suspension period in accordance with the instructions below.

Where any directions on the existing product label differ from the new APVMA instructions and restraints, the APVMA instructions and restraints take precedence.

NEW INSTRUCTIONS FOR USE AS REQUIRED UNDER APVMA DEEMED PERMIT

Use of this product must be in accordance with these instructions as per the APVMA deemed permit.

DO NOT use this product in a manner that is contradictory to the following instructions.

DO NOT place bait stations outdoors for control of mice

DO NOT use in areas accessible to non-target animals, pets or children unless secured in a tamper resistant bait station.

DO NOT place bait outdoors unless it is secured in a tamper-resistant and weather-resistant bait station which is secured in place.

DO NOT place bait stations more than 2 meters from buildings

DO NOT apply this product directly into burrows.

DO NOT use the product continuously for more than 35 days without an evaluation of the state of the infestation and of the efficacy of the treatment.

Hazardous to wildlife. Search for and dispose of dead rodents and slugs/snails in the infested area at each visit to prevent secondary poisoning.

In case slugs/snails are present, move bait station to another location within the rodent infested site, away from slugs/snails. Dispose of slugs/snails, dead rodents and uneaten bait in compliance with local, state or territory government regulations.

When using the product wear disposable gloves. During cleanup and disposal operations of bait and bait stations, wear disposable gloves. Wear disposable gloves when handling rodent carcasses. Wash clothes after performing re-handling activities.
