

Camilleri Under Slab Injection System Licensee Rules

- a. As the Camilleri Underslab System is a patented product, installation cannot be carried out without an appropriate up to date License.
- b. All instalations must he carried out according to its' specification,
- c. All products, including perforated pipe, low density pipe and all fittings must be obtained from a Camilleri System registered distributor. Obtaining fittings elsewhere constitutes a breach in the specification and will result in Licenses being withdrawn.
- d. All Licences must be renewed one month prior to when they fall due for renewal.
- e. All Licensees must be prepared to release to George Camilleri a list of recent installations at random request.
- d. Any one using the Camilleri System without the appropriate licence will render themselves liable to prosecution.

These rules are absolutely necessary In order to fulfil our Quality Control obligation and to insure that The Camilleri Underslab Injection System will continue to perform the very important role termite control for now and for many years to come.

We ask all Licensees to abide by them to the letter. Thank you.
