15 SC INSECTICIDE**APVMA Code :40496****Active Constituent(s):**
15g/L alpha-cypermethrinGROUP **3 A** INSECTICIDE

Registered For

Commercial Use Domestic Use **Overview** FENDONA is a potent, broad spectrum synthetic pyrethroid insecticide effective against a wide range of pests in domestic, industrial and public health situations.

A pyrethroid insecticide in a water based formulation.

Rapid knockdown and very good residual activity.

Controls certain strains resistant to organophosphorus compounds.

Recommended Uses A residual insecticide for control of cockroaches, silverfish, fleas, flies and spiders in domestic, industrial and public health situations.**Advantages** Excellent residual activity, no colour or staining.**Benefits** Less call backs, more satisfied customers.**Mode of Action** FENDONA is a Group 3A synthetic pyrethroid insecticide. It is a non-systemic insecticide with contact and stomach action against a wide range of insect pests. Following ingestion or contact, FENDONA acts against the central and peripheral nerve system, resulting in rapid death of treated insects.**Chemical Group** synthetic pyrethroid**General Instructions**

FENDONA 15 SC Insecticide controls insects by contact action and ingestion. When applied as a surface spray, the product offers long residual activity.

FENDONA is of relatively low toxicity to humans and other mammals and is suitable for use in domestic and public areas.

Application

FENDONA 15 SC can be applied with a knapsack sprayer or other conventional spray equipment used to control public health pests.

To obtain best results all surfaces should be treated, especially cracks, crevices and infested areas. A higher volume of water may be required on very absorbent surfaces. Apply to the point of run-off only.

Shake or invert the container before opening. Carefully measure the required amount of FENDONA 15 SC in a graduated cylinder and add to half the volume of water in the spray tank.

Top up with the remainder of the water and agitate thoroughly. Do NOT store diluted insecticide. Prepare a fresh suspension as necessary.

Evacuate premises to be treated.

The premises can be re-occupied once spray applications are completed. Clean sprayer out thoroughly after use.

Precautions**Precaution**
Avoid contact with food, food utensils, or places where food is

prepared or stored.

Before use - remove or cover all exposed foodstuffs; cover all dishes and utensils, and places where food is prepared or stored.

After use - thoroughly ventilate treated area. Clean up thoroughly before processing/serving resumes.
