BIOPlus
Foam and Liquid Formulation
Biological
DIRECTIONS FOR USE: Apply to drains and other void areas containing organic matter.
For use in Food Plants: Do not use on food contact surfaces avoid contamination of food during use and storage.
Foaming
1. Premix your requirements of BioPlus in a container. 2 ½ Gal. (10 litre) jug.
2. Use the following mixing instructions for best results
Note: Fill Line marked on cap is approx. 3.4 oz. (100mls)
3 1/2 capfuls per gallon for regular maintenance (100mls / litre)
7 1/2 capfuls per gallon for moderate conditions (200mls / litre)
11 1/2 capfuls per gallon for severe conditions (300mls / litre)
When conditions are from moderate to severe, treat weekly for 1st month, biweekly for 2nd month and then once per month for routine maintenance.
3. Only mix up what your requirements will be for the day.
4. Add 1 ½ - 21/2 oz./Gal. (12-25mls/litre) of ProFoam Platinum
5. Refill ProFoamer bottle as required. Dispense foam and BioPlus into void areas. Avoid any contact with food handling surfaces
Liquid: Follow mixing instructions as above, pour and or apply mixed solution into desired locations. Apply 1 gallon (3.78 litres) of concentrate per month if treating directly into grease traps.
