Vanquish Pro
ANT BAIT

Vanquish Pro Ant Bait is a new generation Ant Bait with both protein and carbohydrate in the matrix to attract a wider variety of ants. Vanquish Pro has Fipronil as its active ingredient, at very low levels, so that the bait will find its way right back into the nest where it will do most of the damage to the colony. Vanquish Pro also retains its moisture levels for longer, allowing longer feeding time on the bait once placed in their habitat. Directions must be followed on the label to get maximum effectiveness from Vanquish Pro.
