BEDLAM

INSECTICIDE

KILLS BED BUGS, LICE & DUST MITES™

ACTIVE CONSTITUENT: 4 g/kg d-PHENOTHRIN
16 g/kg N-OCTYL BICYCLOHEPTENE DICARBOXIMIDE

GROUP 3A INSECTICIDE

For control of susceptible strains of bedbugs and other biting pests in hotels, motels, hospitals, nursing homes, offices, homes and other situations as specified in the Directions for Use table.

CONTENTS: 500 g

DIRECTIONS FOR USE

For professional use only. SHAKE WELL BEFORE USE.
Spray in an inconspicuous area to test for possible staining or discoloration. Evaluate test area after drying. Hold container upright with nozzle aimed away from you. Depress valve and spray from a distance of 20 to 25 cm. Spray each square metre for 50 seconds or until damp. Most effective results are achieved when used as part of a treatment protocol that includes physical, environmental and other chemical pest control measures. Vacate room after treatment. Do not allow entry into treated areas until the spray is dry and the room is ventilated. Thoroughly vacuum treated carpets and furniture before using the room. Wash treated bedding and garments before use. Allow sprayed articles and surfaces to dry thoroughly before using or replacing bedding.

To Kill Bed Bugs: Apply as a spot treatment to cracks and crevices on and around baseboards, floor boards, bed frames, wall hangings, headboards, furniture, door and window frames, millwork and walls. Apply as a surface spray to carpet, mattresses, box springs, walls, furniture, bedding, floor and floor coverings, rugs, garments, luggage, closets, drapes and other window appointments. Thoroughly clean and air-out mattresses and box springs. Then treat areas that may harbor Bed Bugs and their eggs, such as tufts, folds and seams.

To Kill Lice: Hold container upright with nozzle away from you. Depress valve and spray from a distance of 20 - 25 cm. Spray evenly over surface to be treated working in small areas. Spray for 5 seconds over a 10 cm x 100 cm area or until the surface is damp. Only spray garments, bedding, including mattresses that cannot be laundered or dry-cleaned. Allow sprayed articles to dry before use.

To Kill Dust Mites: Thoroughly vacuum entire room concentrating on areas where mites congregate such as mattresses, box springs, headboards, walls, floors, carpeting and baseboards. Then spray surfaces until damp. Retreatment at 3 - 4 week intervals may be required.

NOT TO BE USED FOR ANY PURPOSE, OR IN ANY MANNER, CONTRARY TO THIS LABEL UNLESS AUTHORIZED UNDER APPROPRIATE LEGISLATION.

Insecticide Resistance Warning GROUP 3A INSECTICIDE

For insecticide resistance management Bedlam Insecticide is a Group 3A insecticide.
Some naturally occurring insect biotypes resistant to Bedlam Insecticide and other Group 3A insecticides may exist through normal genetic variability in any insect population. The resistant individuals can eventually dominate the insect population if Bedlam Insecticide or other Group 3A insecticides are used repeatedly. The effectiveness of Bedlam Insecticide on resistant individuals could be significantly reduced. Since occurrence of resistant individuals is difficult to detect prior to use, MGK Asia Pacific Pty Ltd accepts no liability for any losses that may result from the failure of Bedlam Insecticide to control resistant insects.
Bedlam Insecticide may be subject to specific resistance management strategies. For further information contact your local supplier or MGK Asia Pacific Pty Ltd representative.

PRECAUTIONS

Keep out of reach of children. Do not spray directly on or toward humans, pets, food, or food preparation surfaces. Wash thoroughly with soap and water after using. Test the product in an inconspicuous part of potentially affected surfaces before using the product.
BEWARE: Deliberately sniffing or inhaling concentrated spray can be harmful or fatal.

STORAGE AND DISPOSAL

Keep it in a cool, dry place and out of the sun. Do not puncture or incinerate can even when empty. Aerosols should be completely empty before disposing. Recycle cans if a facility is available or place used can in household rubbish.

SAFETY DIRECTIONS
May irritate the eyes and skin. Avoid contact with eyes and skin. Wash hands after use.

FIRST AID
If poisoning occurs, contact a doctor or Poisons Information Centre. Phone Australia 13 11 26.

MSDS
Additional information is listed in the Material Safety Data Sheet which can be obtained from the supplier.

Propellant: Hydrocarbon.

APVMA Approval Number: 64048/47278
