EKOFOOD

BAIT OF NATURAL FOOD

TECHNICAL DATA SHEET

FEATURES

EKOFOOD is the line of natural baits developed to effectively attract the three species of rodent pest: *Rattus norvegicus, Rattus rattus e Mus musculus domesticus*. The EKOFOOD line can be used on the Ekologic monitoring device, on the Ekomille capture device, as well as in any other monitoring and capture device used. All the Ekofood are natural, with high attractive power and long duration.

METHOD OF USE

For Ekologic and Ekomille: place the baits in the mangers, in the routable floor and on the stairs, following the instructions in the user manual. For other devices: apply in suitable spaces and in quantities adequate to the needs. Restore according to the control plan, based on consumption and time of use.

FIELD OF USE

All contexts where pest rodents must be attracted, such as livestock farms, companies in the agri-food supply chain, tourism industry, companies in the Ho.Re.Ca. channel, public structures and buildings, parks and public parks, shopping centers, homes, etc.
