Fipronil - Professional Granule Ant Killer

A special graded silica carrier utilising 0.25 g/kg fipronil for use in the control of 'nuisance' ants in Domestic situations by professional pest managers and funnel ants in commercial Turf situations.

Fipronil based formulation for non-repellent treatment of funnel ants in Turf, and nuisance ants in domestic situations.

A high quality graded silica carrier is utilised to provide uniform distribution of fipronil in treated areas.

Optimum sized silica carrier particles are utilised to reduce any inhalation risks by users.

For use in external areas hard to treat with traditional sprays - eg. Garden beds, between pavers, compost heaps, lawns, etc.

Each 10 kg pail comes with a scoop and shaker pack for ease of application in domestic situations.

For best results apply along ant trails and around nests.

Fantastic for sweeping into cracks between pavers.

Fipronil based granule providing total colony eradication with Sundew Smart Kill Technology™.

Does not repel ants like other current granule products on the market.

Available only to professional pest managers and turf specialists.

Convenient ready to use - no mixing required.

Long residual activity.

Broad spectrum of activity - does not distinguish between sugar feeders, protein feeders etc. Controls the lot!

Use with Sundew ANTagonist PRO as part of a total ant control solution program to deliver season long pest elimination. Use ANTagonist PRO for all hard surfaces, and SAS PRO on garden beds, lawns, cracks of pavers, etc.

SAS PRO is a NON SCHEDULED POISON.

BONUS
SHAKER PACK & SCOOP INSIDE EVERY PACK!
