Solar Panel Bird Deterrent

Solar Panel Bird Deterrent Keeps **Birds Out** and **Profits Up**

Rooftop solar panels create an ideal environment for pigeons and other pest birds to nest and roost. The panels provide shade from the hot sun, security from predators, and an easy in-and-out vantage point for birds. What's more, birds can be incredibly persistent, especially if they've nested under solar panels the previous season. Since most solar panels are usually just 8" off the roof deck, removing nests and droppings can be a challenge.

The best way to address this problem is to install bird deterrents, ideally when solar panels are first installed, or at the very least before pest birds arrive.

Virtually invisible when installed

Item Name	Part #	Pack Size
Solar Panel Bird Deterrent Kit	SLRKIT-50	(35) Solar Clips (10) 5' x 8" Hardware Cloth Panels
Solar Panel Bird Deterrent MeshPart	SLRMESH	100 Pack Size: 8" x 100' 1/2" Mesh PVC Black
Solar Panel Bird Deterrent Clips	SLRCLPS-35	35 Solar Clips
	SLRCLPS-50	50 Solar Clips
	SLRCLPS-100	100 Solar Clips

No drilling required
Clips will not scratch or affect integrity of solar panels

Weather resistant mesh panels
The weather-resistant mesh effectively blocks pest birds from nesting or roosting under the panels. It also prevents critters from chewing on the electrical wiring under solar panels.
