Seclira®

Gel Cockroach Bait

Seclira Gel Cockroach Bait is a specifically designed spot treatment for the targeted control of German and other common cockroaches.

Its strong palatability, appealing to gel-bait averse cockroaches, provides a solution to resistance management with a strong transfer effect. Entire colony control is achieved with minimal behaviour, eating and social changes, providing the foundation for its strong, long lasting residual. Available in a convenient 30g pack size, Seclira Gel Cockroach Bait is suitable for domestic and commercial use, with a targeted treatment in areas of known cockroach activity.

SITUATION	PEST	RATES	REMARKS
Domestic, Commercial and Public Service Buildings	German and other common cockroaches	Apply 1-3 spots per m^2. Recommended spot size is 0.25-0.5 g. Increase the number of spots (up to 3) and spot size depending upon severity of infestation and species present.	Gel placement should be at or near areas where cokroaches gater, such as in cracks and crevices

Refer to the product label for full directions and use table.

Packaging

Packaging – 4 x 30g Syringes
