

Xlure HHB
and refills

Xlure HHB (Ham and Hide Beetle trap) is a monitoring trap attracting pests that feed on protein. **Xlure HHB** incorporates a multi-food lure and pheromone mix to ensure maximum attraction. Designed to target the most common pests that attack and contaminate meats, hides, bones, and cheese.

Benefits

- Sturdy plastic shell with replaceable ready to use cartridge
- Combines pheromones and attractants for the monitoring of insects that impact meat and leather products
- Insecticide free and non-toxic/360° access for insects
- Designed to provide an attractive sheltered environment to target insects
- Trap top completely covers the slotted base, preventing dust and debris accumulation
- Angled body on the trap facilitates the upward movement of insects.
- Rough texture around trap base aids pest grip
- Durable, compact trap that is easy to install, with a spill proof replaceable cartridge
- Tether system available to secure traps in place preventing unwanted removal/displacement

Target insects

Hide beetle
Dermestes maculatus

Red-legged ham beetle
Necrobia rufipes

Russell IPM
INTEGRATED PEST MANAGEMENT

Where to use

Curing houses, leather storage and retail, taxidermists, cheese production facilities, dried meat trading and storages, museums with animal skin or protein, dried fish storage and shops.

Application method

Assembly
Peel the foil lid from the refill and remove the release paper from the white glued ring inside the cartridge. Line up the trap so the tether system on the base fits through the hole in the plastic lid and click together.

Where to place/distance
The **Xlure HHB** should be placed on a flat surface. In small rooms one trap will be sufficient. In larger open areas e.g. warehouses and manufacturers, traps should be placed approximately 8-10 metres apart in a grid formation. More traps may be required in buildings with more than one level, where there are obstacles or if there are heavy infestations.

Replacement
Replace the refill every 6-8 weeks unless the trap is full earlier.

Storage

The refills should be stored sealed, in a cool dry place for a shelf life of 12 months. If longer storage is required, store in a fridge or freezer.
