

Xlure Checkpoint

Xlure Checkpoint combines a visual and chemical attraction, with its pre-baited checkered sticky liner and replaceable pheromone dispenser. This unique trap should be every pest controllers first choice for the monitoring of stored product pests.

Benefits

- Durable permanent trap designed for long term monitoring of stored product moths
- When placed in a grid formation throughout a building, the trap can be used to keep moth populations low
- High capacity to hold hundreds of moths
- Waterproof and efficient in dusty areas
- Replaceable liner coated in non-drying glue with pheromone
- Shaped checkered patterned liner proven to increase visual attraction to the trap
- The slow release, long life pheromone dispenser is sealed in a foil pouch to ensure efficacy and non-contamination
- Insecticide free and non-toxic
- Cap and cage provided for lure placement
- Liners and lures can be purchased separately

Target insects

Indian meal moth
Plodia interpunctella

Mediterranean flour moth
Ephestia kuehniella

Tropical warehouse moth
Ephestia cautella

Warehouse moth
Ephestia ellutella

Russell IPM
INTEGRATED PEST MANAGEMENT

Where to use

Food processing plants, manufacturing plants, food storage facilitites, retail pet stores, homes, schools, hospitals and nursing homes.

Application method

Assembly
Remove the protective paper from the back of the liner and place the liner, sticky side inwards, into the moth catcher. Remove the lure out of packaging and secure in the cap and cage. Attach the cap and cage to the top of the moth catcher lid. Line up lid with moth catcher bottom and turn to secure together.

Where to place/distance
The trap should be used as a permanent part of an integrated pest management programme in large areas. Only the lures and liners need to be replaced.
Secure in a grid formation throughout the building to ensure optimum monitoring. One trap every 100 square metres will provide enough coverage, however additional traps can be used in heavily infested areas.

Replacement
Replace lure every 13 weeks and liner every 6-8 weeks unless the trap is full earlier.

Storage

The lures and liners should be stored in their sealed packaging, in a cool dry place for a shelf life of 6 months. If longer storage is required, store in a fridge or freezer.
