

Silvercheck

High in demand, the **Silvercheck** catches 3 times as many common Silverfish *Lepisma saccharinum* and Grey silverfish *Ctenolepisma longicaudatum* compared to a range of commercial traps tested. This ready to use, discreet trap is a self-contained cardboard station with a powerful sticky base and unique lure.

Benefits

- Designed with an irresistible lure to capture both silverfish and grey silverfish
- 3 times more effective than other traps tested
- Attractant individually packed so it stays fresh until use
- Insecticide free and non-toxic
- Designed to be discreet and can be slid under equipment, furniture, in tight corners and behind objects e.g. cabinets, desks and closets.
- Multiple entry points for silverfish and grey silverfish
- High quality cardboard with wings over the centre window to keep out dust and provide air flow to disperse attractant
- Double-sided tape on the back for firm wall attachment or placement around skirting boards and coving

Target insects

Silverfish
Lepisma saccharinum

Grey silverfish
Ctenolepisma longicaudatum

Russell IPM
INTEGRATED PEST MANAGEMENT

Where to use

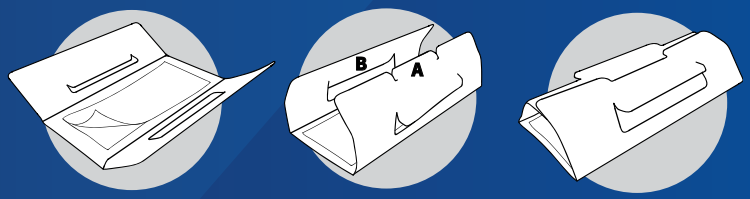

Attics, basements, bathrooms, kitchens, student accommodation, museums, libraries, nursing homes, hospitals, paper mills and schools.

Application method

Assembly
Remove the protective paper and fold tab A into tab B. Tear the packet of attractant and pour it onto the centre of the trap.

Where to place/distance
Place near cracks and crevices where silverfish or grey silverfish like to hide. Position one trap every 25 square metres or more if you wish to pinpoint an infestation.
Lie on a flat surface or peel off the strip on the bottom of the trap to reveal glue to attach the trap to a wall or skirting board.

Replacement
Replace every 6-8 weeks unless the trap is full earlier.

Storage

Store in a cool dry place for a shelf life of 24 months.
