Manufactured by : PelGar International Ltd. UK

2kg

ROBAN® 25 ALL WEATHER BLOCK BAIT

ACTIVE CONSTITUENT 0.025g/kg DIFENACOUM

2kg

DIRECTIONS FOR USE

RESTRAINTS

DO NOT place baits in the open.
DO NOT exceed 3m between bait locations for mice, or 9m for rats.
DO NOT leave baits accessible to children, domestic animals and non-target wildlife.
DO NOT apply baits to crops.

PEST	SITUATION	RATE	CRITICAL COMMENTS
Mice	In and around (within 2 metres) domestic buildings and commercial premises	Use one 20g block per bait point	Place bait points wherever droppings, damage or other signs of activity are seen. Use multiple bait points, not more than 3 m apart.
Rats		Use five 20g blocks per bait point	Place a number of bait points in dry locations throughout the infested area, on runs, in burrows and where droppings are seen, not more than 9 m apart.

General Information and baiting strategy for rats and mice: Eliminate as far as practicable, all other food sources. Always place bait where it is inaccessible to children, animals and birds. Protect and cover bait. When using outdoors, it is best practice to use weather resistant bait stations. It is recommended that lockable, securable, weather resistant bait stations be used where possible. Alternatively, place bait in suitable containers or use weather resistant bait stations constructed from drainpipes or boxes. Fix, nail or wire blocks in place where appropriate. Try not to touch the bait as this deters mice and rats from eating it. Do not place baits where food, feed or water could become contaminated.
Inspect baits frequently, particularly in the first ten days. Replace eaten bait. If bait is completely consumed, the quantity should be increased. Continue replenishing bait until left untouched. Baiting for at least 2 weeks will be necessary to reduce rat/mouse numbers. Most deaths occur 4 to 7 days after consumption of bait, but deaths may occur for up to 2 weeks. During treatment search for and collect dead rats and mice. Following treatment remove all remains of bait and bait containers and search for and collect dead rats or mice. Burn or bury carcasses. Do not place in refuse bins. DO NOT let cats, dogs or non-target animals eat poisoned mice and rats. While handling remaining bait material/animal carcasses, wear rubber gloves.

NOT TO BE USED FOR ANY PURPOSE, OR IN ANY MANNER, CONTRARY TO THIS LABEL UNLESS AUTHORISED UNDER APPROPRIATE LEGISLATION.

GENERAL INSTRUCTIONS

Keep away from food and water, and surfaces that come into contact with food and water.
Contains human taste deterrent, which helps prevent accidental consumption by children.

PROTECTION OF LIVESTOCK, WILDLIFE, FISH, CRUSTACEANS AND ENVIRONMENT

This product is hazardous to pigs, cats, dogs, native wildlife including birds and poultry. Place baits in locations which are inaccessible to other animals and birds.
DO NOT contaminate dams, waterways, sewers and drains with bait or its used containers.
DO NOT use this product to control native animals.
The product is restricted to use in and around buildings (within 2 metres) or enclosed spaces.
In areas where possums and other non-target animals frequent, baits should be secured inside proper bait stations constructed from drainpipes or boxes.

STORAGE AND DISPOSAL: Store in the closed, original container in a dry, cool, well-ventilated area out of direct sunlight. Triple rinse containers before disposal. Dispose of rinsings and unused or untaken bait in a disposal pit specifically marked and set up for this purpose, clear of waterways, desirable vegetation and tree roots. If recycling, replace cap and return clean containers to recycler or designated collection point. If not recycling, break, crush or puncture and bury empty containers in a local authority landfill. If an approved waste management facility is not available bury the empty packaging 500 mm below the surface in a disposal pit specifically marked and set up for this purpose, clear of waterways, desirable vegetation and tree roots, in compliance with relevant Local, State or Territory government regulations. DO NOT burn empty containers or product. Containers that have held bait should not be used for any other purpose.
Regularly search for, remove and destroy dead or affected rodents. Collect and dispose of all rodent carcasses by burning or burial according to State of Territory requirements.

SAFETY DIRECTIONS

Poisonous if swallowed. Will irritate the skin. May irritate the eyes. Repeated minor exposure may have a cumulative poisoning effect. Avoid contact with eyes and skin. If on skin and after each baiting, wash thoroughly with soap and water. Use scoop or measure. When opening the container and using the product, wear elbow-length rubber gloves. After each day's use, wash gloves.

FIRST AID

If poisoning occurs, contact a doctor or Poisons Information Centre. Phone Australia 13 11 26. Vitamin K1 (phytomenadione) is antidotal.

SAFETY DATA SHEET

Additional information is listed in the Safety Data Sheet available from the supplier.

NOTE TO PHYSICIANS AND VETERINARIANS

Difenacoum, the active constituent of Roban 25 All Weather Block Bait, is a long lasting anticoagulant chemical, which if ingested by humans, domestic animals or pets, can reduce the clotting power of the blood and haemorrhage may result. Vitamin K1 (phytomenadione) should be administered urgently by medical, appropriate para-medical personnel or veterinarians. If administered intravenously the injection must be given slowly.

NOTICE

PelGar International Ltd warrants that this product conforms to its chemical description and is reasonably fit for the purposes stated on the label when used in accordance with Directions for Use under normal conditions of use. No warranty of merchantability or fitness for a particular purpose, express or implied, extends to the use of the product contrary to label instructions or under off-label permits not endorsed by PelGar, or under abnormal conditions.
