

rega Gel Applicator

For precision dose control of gel products, the rega Gel Applicator is a great tool to add to your Cockroach Control Equipment. An optional torch holder accessory can also complement this professional tool for use in dark areas.

rega Precision Gel Applicator

For ultra precision dose control of gel products, the rega Precision Gel Applicator is the bee's knees of Gel Applicators. Included is also a pouch which can be clipped to most belts to hold extra accessories.

rega Cockroach Puffer

For applying dust under cupboards, into cracks and crevices and tight areas where gel can not be applied. Extension stems also available.

rega Dual Bait Station

For use with liquids, gel, or granules this dual-use bait station can be mounted horizontally or vertically. Includes pre cut hole for securing.

rega "Slim"

Available in packs of 10, the rega "Slim" is used to monitor or control cockroach problems. In some areas using the rega "Slim" is the only acceptable method of cockroach control. This product is also non-toxic

rega Bait Station

The smaller disposable bait station with ready-to-use self-adhesive backing.
