PERMIT TO ALLOW EMERGENCY USE AND SUPPLY OF AN UNREGISTERED AGVET CHEMICAL PRODUCT

PERMIT NUMBER - 81758

This permit is issued to the Permit Holder in response to an application granted by the APVMA under section 112 of the Agvet Codes of the jurisdictions set out below. This permit allows a Supplier (as indicated) to possess the product for the purposes of supply and to supply the product to a person who can use the product under permit. This permit also allows a person, as stipulated below, to use the product in the manner specified in this permit in the designated jurisdictions. This permit also allows the Permit Holder, the Supplier (if not one and the same) and any person stipulated below to claim that the product can be used in the manner specified in this permit.

THIS PERMIT IS IN FORCE FROM 23 DECEMBER 2015 TO 30 NOVEMBER 2016.

Permit Holder and Supplier:
BASF AUSTRALIA LTD
Level 12, 28
Freshwater Place
SOUTHBANKVIC3006

Persons who can use the product under this permit:
Persons authorised or licensed under the relevant state or territory poisons controls for Schedule 7 poisons and who are operating under the direction of the production operations manager of the facility.

CONDITIONS OF USE

Unregistered product to be used:
SELONTRA SOFT BAIT RODENTICIDE
Containing: 0.75 g/kg CHOLECALCIFEROL as their only active constituent.

Directions for Use:
To be use in accordance with the unapproved label attached in Attachment 1.

To avoid doubt in respect to the **Situation**; this product may be used both:

1. Immediately outside buildings used for and associated with commercial pig production and
2. In areas up to 9 meters away from buildings were structure consistent with the labels general instructions allow for the placement of bait stations.

Areas more than 9m away from buildings should only be baited with currently registered products that are approved for use in those situations.

Jurisdiction:
NSW, Queensland, Tasmania, South Australia, Western Australia, Northern Territory, ACT and Victoria *.

* NOTE Schedule 7 Poisons are "specified chemical products" under Victoria's control of use legislation. These products must be used in accordance with permits issued by the Department of Economic Development, Jobs, Transport and Resources. For further information please contact **DEDJTR Customer Service Centre on 136 186 or visit the DEDJTR website: www.depi.vic.gov.au/chemicaluse.**

Additional Conditions:
PERSONS who wish to prepare for use and/or use products for the purposes specified in this permit must read, or have read to them, the details and conditions of this permit.

An Integrated Rodent Pest Management Strategy is essential to the efficacy of the product under this permit. The implementation of other control methods and improved facility hygiene is fundamental to any successful rodent control program.

Supply and record keeping:
Supply:

1. The supplier must supply the product in a container that complies with the requirements of section 18(2) of the Agricultural and Veterinary Chemicals Code Regulations.
   The container must:
   a) be impervious to, and incapable of chemical reaction with, its contents when under conditions of temperature and pressure that are likely to be encountered in normal service; and
   b) have sufficient strength and impermeability to prevent leakage of its contents during handling, transport and storage under normal handling conditions; and
   c) if it is intended to be opened more than once—be able to be securely and readily closed and reclosed; and
   d) have sufficient excess capacity to prevent it from breaking if its contents expand during handling, transport or storage; and
   e) enable all or any part of its contents to be removed or discharged in such a way that, with the exercise of no more than reasonable care, the contents cannot:
      i. harm any person; or
      ii. have an unintended effect that is harmful to the environment.

2. Attached to this container must be a label which is identical in content and format to the label in Attachment 1.

3. This permit allows only the person or company listed as the Supplier to possess the product for the purposes of supply and to supply the product to the persons who can use the product under the conditions of this permit.

3. The Holder must keep a consolidated record of supply of the Product under this permit. The record must include:

   a) the date of supply; and

   b) the batch number of the Product supplied; and

   c) the name and address details of each person to whom the supply was made; and

   d) the quantity supplied; and

   e) A copy of the user's state or territory issued license or permit authorising access to s7 scheduled products.

DIRECTIONS FOR USE

RESTRAINTS

DO NOT exceed 3 m between bait stations for mice, or 9 m for rats.
DO NOT place bait blocks in the open.
Baits MUST only be used within lockable tamper resistant bait stations.
Baits MUST be secured within bait station so that rodents cannot remove bait and/or horde or stockpile bait away from the station.
DO NOT use this product for the control of native rodents or other native animals.
The bait stations MUST only be placed on the ground outside piggery buildings, against the walls of the buildings and areas away from pig access.

SITUATION	PEST	RATE	CRITICAL COMMENTS
External use ONLY Perimeter baiting outside buildings used for and associated with commercial pig production	Rats - *Rattus rattus* also known as Black rat, Roof rat, Ship rat or, Fruit rat and *Rattus norvegicus* also known as the Brown rat or Norway rat.	2 - 8 SELONTRA Soft baits per bait station	Eliminate as far as practicable all alternative food sources. This is essential to improving efficacy of a baiting program. Select suitable bait station locations, such as along rat runs or areas exhibiting signs of infestation. Try to establish a barrier of bait locations between living and feeding areas. Secure 2 - 8 SELONTRA Soft Baits at each bait location. SELONTRA Soft Baits must be secured within lockable tamper resistant bait stations (e.g. ROGUARD® Xtra Rat Stations). On initial application, an inspection of bait locations after 3 days may be undertaken to determine activity in bait locations and new locations may be selected if necessary. A subsequent inspection may also be undertaken again after 4 days to replace any soft baits which have been eaten. For severe infestations it is recommended that repeat inspections of all bait locations is conducted at 7 day intervals, replacing fresh Soft Baits only when Soft Baits have been eaten and until all signs of rat activity have disappeared. To the extent possible, rodent access to pigs and pig housing should be prevented. To the extent possible, dead rodents and rodents displaying signs of poisoning should be removed from the inside of piggeries immediately. Appropriate Personal Protective Equipment (PPE) must be worn when retrieving dead and dying rodents. See Safety Directions below.

	Mice – *Mus musculus* also known as the House mouse.	1 - 2 SELONTRA Soft Baits per bait station	Mice have very limited home ranges and do not need to drink. They are more difficult to control than rats because their feeding patterns are more erratic. Secure 1-2 SELONTRA Soft Baits within tamper resistant bait stations (eg. ROGUARD® Mouse Stations) 3 metres apart. Inspect bait locations and replace Soft Baits as for rats until all signs of mouse activity have disappeared. To the extent possible, rodent access to pigs and pig housing should be prevented. To the extent possible, dead rodents and rodents displaying signs of poisoning should be removed from the inside of piggeries immediately. Appropriate Personal Protective Equipment (PPE) must be worn when retrieving dead and dying rodents. See Safety Directions below.

NOT TO BE USED FOR ANY PURPOSE OR IN ANY MANNER CONTRARY TO THIS LABEL UNLESS AUTHORISED UNDER APPROPRIATE LEGISLATION.

GENERAL INSTRUCTIONS

SELONTRA Soft Baits must only be placed outdoors along the base of the walls of buildings, and in areas up to 9 metres away from buildings. SELONTRA Soft Baits must be secured in lockable tamper resistant bait stations, such as ROGUARD® Xtra Rat or ROGUARD® Mouse Stations. Rats and mice that are resistant to anticoagulants are controlled without the need for pre-baiting.
DO NOT place baits in areas accessible to domestic animals, children, pets and wildlife. DO NOT place baits in areas liable to flooding. Alternative food sources should be removed or reduced as much as possible. DO NOT allow bait to contaminate food stuffs or food intended for human or animal consumption.A lethal dose is readily consumed in a single feed but death may not occur for up to seven days. Collect and dispose of all dead rodents and unconsumed bait properly. Ensure baits are removed when rodent activity has ceased.

PRECAUTIONS

This product mustbe placed within lockable tamper resistant bait stations.
DO NOT Place baits in areas accessible to children and pets.

PROTECTION OF LIVESTOCK, WILDLIFE, FISH, CRUSTACEANS AND OTHERS

This bait is hazardous to pigs, cats, dogs, poultry, birds and wildlife. DO NOT place baits in locations which are accessible to other animals or birds. DO NOT contaminate ponds, streams, rivers or waterways with the bait or its used containers. The use of this product for the control of protected native rodents requires permission from wildlife authorities.

STORAGE AND DISPOSAL

Store in the closed original container in a cool, well ventilated area. Do not store for prolonged periods in direct sunlight.Store in a locked room or place away from children, animals, food and feedstuffs, seed and fertilisers. Do not dispose of chemical on site.Containers which have held bait should not be used for any other purpose. Break, crush or puncture and deliver empty packaging to an approved waste

management facility. If an approved waste management facility is not available, bury the empty packaging 500 mm below the surface in a disposal pit specifically marked and set up for this purpose, clear of waterways, desirable vegetation and tree roots, in compliance with relevant local, state or territory government regulations. Do not burn empty containers or product. Collect and dispose of all dead rodents and unconsumed bait properly.

SAFETY DIRECTIONS

Poisonous if swallowed or absorbed through the skin. Repeated minor exposure may have accumulative poisoning effect. Avoid contact with eyes and skin. When opening the container, using the product, disposing of unused baits and retrieving dead and dying rodents, wear protective clothing, fastened to the neck and wrist and disposable gloves. After use and before eating, drinking or smoking, wash hands, arms and face thoroughly with soap and water. After each day's use wash contaminated clothing.

FIRST AID

If poisoning occurs, get to a doctor or hospital quickly.

SDS

Additional information is listed in the Safety Data Sheet available from your supplier.

CONDITIONS OF SALE
