GARRARDS

"SERVICE WITH INTEGRITY"

Battery kit, contains 4 each 'AA' Li-ion batteries, charger, USB cable (optional), instructions, and a box.

Battery Notes:

1. Battery kit you have may not be exact, this is a representation of a battery kit
2. Batteries are made of Li-ion and are rechargeable, the specifications on each are 1.5vDC @ 2000mAh (or better)
3. Batteries take about 4 hours to fully charge, depending on your charging plug
4. Standard 1.5vDC Alkaline batteries can be used in emergency

Extention pole, marked every inch for convenience

LCD display, displays events when activated

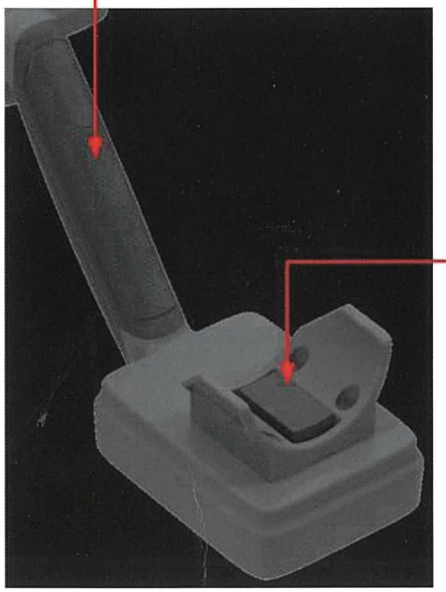

Battery removal strap, lay down first, easier to remove batteries

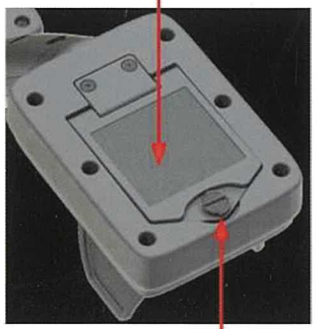

Batteries, when inserting, note the '-' sign toward spring

Extention pole lock, turn counterclockwise to loosen

Hand grip, grip for holding StationSeeker stable

Battery compartment, holds 4 each 'AA' batteries

Activation Switch, engages when operator holds the unit

Turn screw counterclockwise to open battery compartment
