Knotted Netting
19mm

UV stabilized high-density polyethylene knotted netting

Our bird nets are constructed from mono-filaments designed specifically for bird net systems. They are extruded to 0.3mm thick. They are then twisted into a twine which is 12/6 strands thick.

Product Description:

Material: High-density polyethylene ultraviolet stabilized twine 12/6

Product Size: We can manufacture nets to the specific dimensions according to your request.

Mesh size: 19mm x 19mm (= 3/4" x 3/4")

Diameter: 1 mm

Twine Breaking Strength: 15kg

Weight Per Square Meter: 68g

Construction: 600 denier (0.30mm thick) monofilament HDPE which is then twisted x 2, then x 3 to make the finished twine approximately 1mm in diameter, with a 12/6 construction.

Life Span: 10-year guarantee for Black mesh (3-year guarantee for White & Stone)

Available in Black, Stone, or White(Translucent).
