DIRECTIONS FOR USE

RESTRAINTS

DO NOT place in areas that are routinely washed.

SITUATION	PEST	RATE	CRITICAL COMMENTS
Domestic, commercial, industrial and public buildings and facilities (including but not limited to food processing establishments, shops, factories, farm buildings, hotels and backpacker accommodation, ships, trains, aeroplanes, offices, schools, storerooms, hospitals, barracks, private houses and external areas associated with such establishments)	German and other Common cockroaches, Ants, Silverfish	Apply 1-3 spots of gel per m^2. Recommended spot size is 0.03 - 0.06 g. Increase the number of spots (up to 3) and spot size depending on severity of infestation. Ants: Apply lines of gel approximately 10-25 mm long for highly active ant foraging trails.	Gel placement should be at or near areas where cockroaches, ants or silverfish gather, along active foraging trails, nest sites or known active areas. Gel may be placed in bait stations or bait cafes, where required. Inspect bait placements periodically for consumption or attractiveness and reapply as required.

NOT TO BE USED FOR ANY PURPOSE, OR IN ANY MANNER, CONTRARY TO THIS LABEL UNLESS AUTHORISED UNDER APPROPRIATE LEGISLATION.

GENERAL INSTRUCTIONS

To apply the gel, remove the cap on the nozzle and touch the tip to the surface to be treated and depress plunger slightly. Recap the dispenser after treatment is completed and return cartridge to the outer pack. Re-apply according to remaining level of infestation, when bait is no longer visibly present. A visual inspection of gel placements is recommended one month after initial treatment.

Food Handling Establishments

Apply as a crack and crevice treatment only. Avoid contact with food, food utensils and food preparation surfaces. GOLIATH PLUS GEL BAIT can be wiped off from areas that have

been treated unintentionally using a moist paper tissue, which can be added to the domestic garbage. Clean this area thoroughly.

INSECTICIDE RESISTANCE WARNING

GROUP **2B** | **13** INSECTICIDE

For insecticide resistance management GOLIATH PLUS GEL BAIT is a Group 2B & 13 insecticide. Some naturally occurring insect biotypes resistant to GOLIATH PLUS GEL BAIT and other Group 2B & 13 insecticides may exist through normal genetic variability in any insect population. The resistant individuals can eventually dominate the insect population if GOLIATH PLUS GEL BAIT or other Group 2B & 13 insecticides are used repeatedly. The effectiveness of GOLIATH PLUS GEL BAIT on resistant individuals could be significantly reduced. Since occurrence of resistant individuals is difficult to detect prior to use, BASF Australia Ltd accepts no liability for any losses that may result from failure of GOLIATH PLUS GEL BAIT to control resistant insects. For further information on managing insecticide resistance contact your local supplier or BASF Australia Ltd representative.

PRECAUTION

DO NOT apply directly to food, food utensils, food packaging or food preparation surfaces.

PROTECTION OF WILDLIFE, FISH, CRUSTACEANS AND ENVIRONMENT

Very toxic to aquatic organisms. Do NOT contaminate streams, rivers or waterways with the chemical or used containers. DO NOT apply this product in any areas easily accessible to children or animals.

STORAGE AND DISPOSAL

Keep out of reach of children.

Store in the closed, original container in a cool, well-ventilated locked place out of the reach of children. Do not store in direct sunlight. Dispose of empty container by wrapping in paper, placing in plastic bag and putting in the garbage.

SAFETY DIRECTIONS

May irritate the skin. Repeated exposure may cause allergic disorders. When using the product wear disposable gloves. Wash hands after use.

FIRST AID INSTRUCTIONS

If poisoning occurs, contact a doctor or Poisons Information Centre. Phone Australia 13 11 26. New Zealand 0800 764 766.

SAFETY DATA SHEET

Additional information is listed in the Safety Data Sheet.

CONDITIONS OF SALE
