InVade technology

Bio Drain™

No harsh Chemicals or Fumes

Thick Coating Action

Probiotic Cleaner

Multiple Uses

DIRECTIONS FOR USE

InVade™ Bio Drain™ contains premium, natural microbes that eliminate organic debris and odors, and citrus oil, in a thickened formula to coat the sides of drains. It cleans the way mother nature intended without harsh chemicals or fumes. Do not blend with bleach, acid or caustic cleaners, disinfectants or antimicrobial products. Contact us for recommendations for other applications.

Drains: Moisten drain with warm water (1-2 gal) if not used regularly, and apply at low drain usage times of the day. Apply to each drain around the edges sufficient to coat the sides of the drain. 4 oz is typical for a 4" drain. Adjust the amount up or down for larger or smaller drains. Repeat every other day for the first week and then 1-2 times per week, or as needed, for ongoing maintenance. InVade Bio Drain can also be used to treat sugary build-up that can clog soda fountain drip tray drain lines. Apply about 1 oz to each drain, weekly or as needed.

Other Applications: For mopping, use 4 oz per standard yellow mop bucket. For other surface cleaning, such as dumpsters, trash chutes and urinals, use 4-8 oz per gallon of water and apply with a sprayer. To foam the product, place 4-8 oz in a gallon of water and add 2-4 oz of foaming agent and apply using a foamer. InVade Bio Drain may also be used in power sprayer systems or hose end sprayers at a rate of about ½ to 2 oz per gallon of water. Spray or foam areas where organic build-up has accumulated and/or where odors are a problem. These areas include under and behind equipment, drains, floors, baseboards, the floor-wall junction, trash cans, enclosures and chutes, dumpsters and pads, urinals, kennels and other animal areas, bird, rodent or other animal droppings, and other hard surfaces where organic build-up and odors are a problem. Do not rinse treated areas or use bleach, caustic cleaners or disinfectants in the treated area.

Precautions: Keep out of reach of children. If more than an incidental amount is swallowed, seek medical attention immediately. Give one glass of water and do not induce vomiting. Wash hands well after use. If in eyes, remove contacts and flush with water for 15 minutes. Seek medical attention for any persistent irritation. Do not apply to unsealed wood. If the product contacts a direct food contact surface, rinse thoroughly before resuming food contact. Store in a closed, appropriately labeled container between 35 and 95 °F.
