MANCOFLO 420 SC - *Liquid Fungicide*

MANCOFLO 420 SC LIQUID FUNGICIDE

Mancoflo 420 SC Liquid Fungicide is an economical easy to use protectant fungicide containing 420g/L Mancozeb in a liquid formulation. In bananas it is registered for the control of Leaf Spot/Speckle, Fruit Speckle, Cordana Leaf Spot, Black Pit. In almonds for Brown Rot. In grapes, cucurbits and poppies for Downy Mildew. In potato and tomato for Target Spot. In chickpea and lentils for Blight.

MANCOFLO 420 SC MODE OF ACTION

Mancozeb is classified as a Group M3 Fungicide (formally Group Y). Mancozeb has multiple site activity and primarily affects fungal development by inhibiting acetaldehyde dehydrogenase, an enzyme vital to normal cellular metabolism of fungi.

Mancozeb is a non-systemic, contact fungicide that has protectant activity. Mancozeb will provide at least 7-10 days reliable protection protection from susceptible disease following an application. Mancozeb does not provide curative control and should be combined with or rotated with other chemicals with curative action for best disease control.

Features of Mancoflo Fungicide

- ✔ Proven performance over many years.
- ✔ Easy fast to use liquid formulation.
- ✔ Low scheduling – when compared to other protectant fungicides.
- ✔ Registered for use in multiple crops
- ✔ Synergistic action with several other fungicides when used in combination.
- ✔ Good tank mix flexibility.
- ✔ Reduced potential for resistance due to multiple site mode of action.

Mancoflo at a glance

Active Ingredient	420g/L Mancozeb
Formulation	Suspension Concentrate
Pack Size	20L
Rate	Refer to label for crop specific rates
Poison Schedule	Schedule 5 (Caution)
Mode of Action	Group M3 Fungicide

APPLICATION INFORMATION

Add the required quantity of **Mancoflo 420 SC** Liquid Fungicide to water in the spray tank and mix thoroughly. Maintain agitation during mixing and application.

Mancoflo 420 SC Liquid Fungicide should be applied as directed to crop foliage and thorough coverage is required to ensure adequate control.

Mancoflo 420 SC Liquid Fungicide may be applied by aircraft to applicable crops in at least 30 to 50 litres of spray volume per hectare.

For detailed crop specific instructions refer to the product label.

UMBRELLA 905

Non-Ionic Sticker Spreader Spray Adjuvant

ACTIVE CONSTITUENT: 905 g/L di-1-p-MENTHENE

Umbrella from Barmac is a multi-purpose spray adjuvant designed to increase the efficiency of applied pesticides and fertilisers in agricultural and horticultural situations. Umbrella forms a rainfast film over the applied pesticide solution, securing it onto the plant surface, reducing environmental losses and enhancing application efficacy.

Umbrella also optimises spreading and surface coverage on hard to wet plant surfaces, further improving application results.
