APPROVED LABEL

DIRECTIONS FOR USE

DO NOT exceed 3m between bait stations for mice, or 9m for rats. DO NOT place bait stations in the open.

SITUATION	PEST	RATE	CRITICAL COMMENTS
In and around domestic homes, industrial and commercial buildings, animal houses, farms, wharves, public service buildings, food factories, hospitals, inside transport vehicles (including ships) and around grain terminals.	Rats (*Rattus norvegicus, Rattus rattus*) Mice (*Mus musculus*)	2 to 8 x 28 g blocks per bait station 1 to 2 x 28 g blocks per infested area	Eliminate as far as practicable, all alternative food sources. Bait infested area. Inspect bait stations daily. Replace eaten baits. If eaten quickly increase number of bait stations. Continue observation and replenishment until no more baits are taken. Baiting for at least two weeks is necessary to reduce rat/mouse numbers.

NOT TO BE USED FOR ANY PURPOSE, OR IN ANY MANNER, CONTRARY TO THIS LABEL UNLESS AUTHORISED UNDER APPROPRIATE LEGISLATION.

GENERAL INSTRUCTIONS

Determine areas where rats and/or mice will most likely find and consume bait. Generally, these areas are along walls, by gnawed openings in or beside burrows, in corners and concealed places between floors and walls or in locations where rodents or their signs have been observed. Protect bait from rain or moisture. Replace contaminated or spoiled bait immediately. To prevent reinfestation, eliminate food, water and harbourage as much as possible. If reinfestation should occur, repeat treatment. Where a continuous source of reinfestation is present, establish permanent bait stations and replenish bait as needed. Collect and dispose of all dead rodents and unconsumed bait properly. Baiting for at least two weeks is necessary to reduce rat/mouse numbers.

PRECAUTION

The use of this product for the control of protected native rodents requires permission from wildlife authorities.
DO NOT allow bait to contaminate foodstuffs or food intended for human or animal consumption.
DO NOT apply bait to crops.
DO NOT place in positions where there is a possibility of contaminating food or surfaces that come into direct contact with food.
The product is restricted to use in and around buildings (within 2 metres) or enclosed spaces.

PROTECTION OF WILDLIFE, FISH, CRUSTACEA AND ENVIRONMENT

DO NOT contaminate dams, rivers or streams with the chemical or used container. Place baits in locations which are inaccessible to other animals and birds. This product is hazardous to pigs, cats, dogs, native wildlife and poultry.

STORAGE AND DISPOSAL

Store in the closed, original container in a well ventilated area, as cool as possible. DO NOT store for prolonged periods in direct sunlight. Store in locked room or place away from children, animals, food and foodstuffs, seed and fertilisers. Do not dispose of chemicals on site. Break, crush, puncture and bury empty containers in a local authority landfill. If not available, bury the containers below 500mm in a disposal pit specially marked and set up for this purpose clear of waterways, vegetation and roots. Empty containers and product should not be burned. Dispose of carcasses safely by burying and burning in an approved landfill.

SAFETY DIRECTIONS

Poisonous if absorbed by skin contact or swallowed. Repeated minor exposure may have a cumulative poisoning effect. Avoid contact with skin. When preparing product for use wear elbow-length pvc gloves. If on skin and after each baiting, wash thoroughly with soap and water. After each day's use, wash gloves. Vitamin K_1 (Phytomenadione) is antidotal.

FIRST AID

If poisoning occurs, contact a doctor or the Poisons Information Centre (phone Australia 131126; New Zealand 0800 764 766)
