Sentricon AG Termite Bait contains an insect growth regulator in an above ground station for the control of subterranean termites. To effectively use this product the user needs to have a thorough understanding of subterranean termite biology and behaviour with a particular emphasis on conditions conducive to termite activity.

DIRECTIONS FOR USE

- **DO NOT** remove protective wrapper from Sentricon AG until ready for use.
- **DO NOT** use bait matrix without Sentricon AG housing.

Situation	Pest	Critical Comments
Use where termite presence has been detected, e.g. on buildings, fences, utility poles, trees and landscape structures. (Except Tasmania)	Subterranean Termites	Attach the station to a surface over which termite activity occurs. (see GENERAL DIRECTIONS section)

NOT TO BE USED FOR ANY PURPOSE, OR IN ANY MANNER, CONTRARY TO THIS LABEL UNLESS AUTHORISED UNDER APPROPRIATE LEGISLATION.

GENERAL DIRECTIONS

Sentricon AG must remain in place while termites are feeding in the bait stations. The bait station should be monitored at a frequency that allows for bait replenishment before the termites fully consume the bait, 2 to 6 week intervals dependent on activity level. When nearly all the bait has been consumed and termite feeding is still likely, replenish the bait matrix with a new Sentricon AG Termite Bait. Station housings can be stacked on top of each other.

If feeding has not occurred for 2 consecutive monitoring visits (generally 2 months), the Sentricon AG Termite Bait can be removed. Ensure periodic inspections of the structure continue to ensure termite activity has ceased.

Before use it is essential to read the current Sentricon Technical Manual available from a Dow AgroSciences Customer Service Representative, or our website.

Preparation of the Bait before use

Cut one corner of the polyethylene bag containing the bait matrix with scissors. Pour approximately 200 mL of water into the bag and massage until the bait matrix is evenly wetted and becomes a doughy consistency. Add more water if necessary. With a clean knife or scissors, cut a generous size opening in the bag and place it into the previously mounted station housing with the bait making firm contact with the termite workings. Clip the bridge and then the station lid in place.

PROTECTION OF WILDLIFE, FISH, CRUSTACEANS AND ENVIRONMENT

This product is very highly toxic to aquatic invertebrates. DO NOT contaminate streams, rivers or waterways with the chemical or used containers.

STORAGE AND DISPOSAL

Store in the closed, original container in a dry, cool, well ventilated area, out of direct sunlight. Used Sentricon AG bait stations may be disposed of at a local authority landfill. Do not burn empty containers or product.

SPILLS

Pick up material and contain in refuse vessel for disposal. Prevent entry of spilled material into drains or waterways. Bury cleaned up material at a local authority landfill that does not burn its refuse. In some States, wastes can only be buried at a licensed landfill.

MATERIAL SAFETY DATA SHEET

Additional information is listed on the Material Safety Data Sheet for Sentricon AG Termite Bait which is available from Dow AgroSciences on request. Call Customer Service Toll Free on 1-800 700 096.

NOTICE

Seller warrants that the product conforms to its chemical description and is reasonably fit for the purposes stated on the label when used in accordance with directions under normal conditions of use. No warranty of merchantability or fitness for a particular purpose, express or implied, extends to the use of the product contrary to label instructions or under off-label permits not endorsed by Dow AgroSciences, or under abnormal conditions.
