THERMAL CARRIER II

Description:
Special fogging mist formulation for the application of wettable powders and liquid chemical control agents i.e. disinfectants, germicides, pesticides etc (flowables etc). Use with thermal fog and mist applicators. For best results follow directions on the label.
Notice: Seller makes no warranty other than specified on this label. The buyer agrees that the seller shall not be responsible nor liable for injury to crop, soil, person, animal or property arising from careless or improper use or handling or the product or application equipment used in the dispersion of the product.

Directions for Use
Mixing Instructions: Premix the required amount of Thermal Carrier II at the desired dilution rate. Mix well and use as required. For every 100m2 of floor area determine the amount of chemical control agent (pesticide, germicide, disinfectant, etc) required from the product label and add to 3 litres of Thermal Carrier 11 solution. Notes on Dilution: Always dilute with a minimum of 2 parts water to 10 parts product. Depending on the equipment used and the degree of fog density required, this product must be to varying degree, diluted with water. ** For use in thermal mist machines, the product may be diluted to a maximum of one part Thermal Carrier II to six parts water. ** With thermal fog equipment, dilution is recommended to be between one part Thermal Carrier II and either two, three or four parts of water. The actual dilution chosen is dependent on the density of fog desired.

First Aid:
Inhalation
If inhaled, remove person from contaminated area. Remove contaminated clothing and loosen remaining clothing. Allow patient to assume a comfortable position. Apply artificial respiration if not breathing.
Ingestion
Do not induce vomiting. Wash out mouth thoroughly with water. If vomiting occurs, give further water to achieve effective dilution. Seek medical attention.
Skin
Wash skin with plenty of water. Ensure contaminated clothing is washed before re-use or discard. Seek medical attention if burning, irritation or redness develops.
Eye contact
If in eyes, hold eyelids apart and flush the eyes continuously with running water. Remove contact lenses. Continue flushing until advised to stop by the Poisons Info Centre or a doctor, or for at least 15 mins.
For advice, contact Poisons Information Centre (Phone Australia on 13 11 26) or a doctor
