The resistant individuals can eventually dominate the insect population if SAS PRO® Professional Granule Ant Killer or other Group **2B** insecticides are used repeatedly. The effectiveness of SAS PRO® Professional Granule Ant Killer on resistant individuals could be significantly reduced. Since occurrence of resistant individuals is difficult to detect prior to use, Sundew Solutions Pty Ltd accepts no liability for any losses that may result from failure of SAS PRO® Professional Granule Ant Killer to control resistant insects. SAS PRO® Professional Granule Ant Killer may be subject to specific resistance management strategies. For further information contact your local supplier or Sundew Solutions representative.
