Technical Data Sheet

Version 1

Product

Pheronet Trap

Code

001-STD-PHNTC2

Description

A discreet and effective sticky trap that monitors and detects moth activity at an early stage in order to prevent infestation. It contains *Plodia/Esphestia* spp. and *Lasioderma serricorne* pheromones to effectively trap: Indian Meal moth, Tobacco moth, Almond moth, Raisin moth, Mediterranean flour moth and Cigarette beetle.
Active ingredient: Nature identical pheromones.
Inert ingredient: Cardboard.
Longevity: 3 months.
Packaging: 1 plastic bag containing 5 Pheronet traps, 5 *Plodia ephestia* and *Lasioderma* combo lures and 5 green ties (1 strip).

Application

- Remove the release paper covering the glue and form the trap into the triangular shape.
- Take the lure and place onto the glued area of the trap, the lid of the vial does **not** need to be removed as the pheromone is impregnated into and released through the plastic surface of the vial.
- Write the date on the trap.
- Place the trap in problem area.
- Leave the trap for 3 months before returning to see what you have caught.

Storage

Store the boards separately in a cool, dry place out of direct sunlight. The lures must be kept refrigerated below 10°C.

Precautions

Handle trap with care, avoiding adhesive surface.
Wash hands before and after handling.
Keep away from children and pets.
